PROFESSIONAL SUMMARY

Backend Java Developer with **3+ years** of experience building scalable Spring Boot microservices and REST APIs. Strong hands-on expertise in Java 8, DSA, Spring Security (JWT/OAuth2), Kafka, RabbitMQ, JPA/Hibernate, and SQL/NoSQL databases. Experienced in CI/CD pipelines, Docker, AWS, and Agile environments, delivering secure and high-performance backend systems.

TECHNICAL SKILLS

- **Backend:** Spring Boot, J2EE, Spring MVC, Hibernate, JPA, Microservices Architecture, REST API Development, System Design
 - **Testing:** JUnit, Mockito
 - **Security:** Spring security, OAuth2, JWT
 - **Messaging:** RestTemplate, WebClient, OpenFeign, Kafka, RabbitMQ
 - **Core skills:** Java, Data Structures and Algorithms (DSA), Multithreading & Concurrency, Exception Handling, Java 8, Design Patterns
 - **Database:** SQL- PostgreSQL, MySQL, Oracle, NoSQL - MongoDB
 - **DevOps & Tools:** Docker, CI/CD, AWS, Jenkins, GitHub Actions, Maven, Gradle, Apache Tomcat, IntelliJ IDEA, STS, Postman, JIRA, Git
-

PROJECT EXPERIENCE

Starlite Infotech Private Limited, Bangalore - Junior Software Engineer (Backend Developer) | August 2024 – Present

Project: DealMatrix | Client: Global Software limited

- Migrated legacy modules into Spring Boot microservices, enabling real-time integrations and overall system scalability.
- Improved transaction streaming by 22% using Kafka & RabbitMQ for inter-service communication.
- Developed centralized exception handling and request validation, reducing runtime API failures by 25%.
- Created and automated CI/CD pipelines using AWS, Jenkins, GitHub Actions, reducing release cycles by 18%.
- Spearheaded the refactoring of the user authentication module using Spring Security, decreasing average API response time by 20% and improving overall system security architecture.
- Collaborating with cross-functional teams to gather requirements, communicate technical solutions, and deliver features on time.

Concentrix Catalyst Private Limited, Hyderabad - Software Engineer Intern (Backend Developer) | July 2022 – July 2024

Project: Crew Syncing System | Client: UPRR (Union Pacific Railroad)

- Enhanced database performance by 20% and overall data processing speed by 35%.
- Optimized PostgreSQL and MongoDB queries, achieving a 27% performance boost.
- Architected 30+ reusable REST APIs utilizing Hibernate/JPA, streamlining data access across microservices & reducing development time by 20% due to enhanced code reusability.
- Implemented unit testing with JUnit & Mockito, reducing bugs by 14% and API testing through postman.

Project: Cloud SQL Migration | Client: PST Technologies

- Migrated enterprise applications from Oracle to PostgreSQL (Cloud & On-Prem). Reduced query execution time by 20% through SQL optimization.
 - Resolved critical API bugs and Exceptions via root-cause analysis, Performed manual testing for minimal downtime and documented migration processes, improving team onboarding by 25%.
-

EDUCATION

- **B.Tech (Bachelor of Technology)** – Electronics and Communication Engineering (ECE)
Sri Vasavi Engineering College, Pedatadepalli, AP | **2018 – 2022** | **CGPA: 7.51**
